

IRITEL was founded in 1967. Today, with some 140 highly educated and skilled employees and many years of experience in the field of telecommunications and electronics, IRITEL is a well-established company highly ranked as a major player on the Serbian telecommunications market.

Our main business activities are:

research, development, design, manufacturing, engineering, consulting, maintenance and technical and customer training.

For over 55 years IRITEL has been designing, engineering and manufacturing systems in the following areas of telecommunications and electronics:

- Digital transmission systems
- Digital switching systems
- Digital radio communications
- Power electronics

Some of the most important IRITEL products and services are:

Transmission systems:

- OTN/DWDM Optical transmission systems
- NG SDH Optical transmission systems
- WDM/CWDM/OADM solutions
- Access multiplexers
- TDM over IP devices
- Ethernet over TDM devices
- Ethernet switches with media converters
- Encryption devices
- Network management systems (NMS/EMS)

Radio communications:

- Software radio
- Radar systems
- Antenna distribution systems
- Radio surveillance and monitoring systems
- Cellular jammers

Power electronics:

- Remote monitoring and control of power electronics devices
- Uninterruptible power supplies for telecommunications
- Batteries capacity control devices

Telecommunication systems engineering:

- Network design
- Turn-key solutions

Manufacturing services:

- SMT production lines
- Hybrid-Thick Film
- Devices assembly
- PCB design service
- Contract & OEM production

Quality assurance and environmental testing

IRITEL pays great attention to the highest quality and reliability of its products and services, showing its total quality commitment to the benefit of its customers.

IRITEL has a Management System: SRPS ISO 9001:2015, SRPS ISO 14001:2015, SRPS ISO 45001:2018, SRPS ISO/IEC 27001:2022 and COPC 9000/21.
